

# Mandalay Bay, Employee Dining Room, Las Vegas:

When Mandalay Bay needed to renovate their employee dining room, they wanted to create mural wall covering, something that reflected both the diversity of their employees and their upbeat style. The design for the office was very contemporary, bright and crisp, and needed equaling stylish wall coverings. The owners loved a graffiti mural they had seen, and that was the direction taken for the design. Over many drafts, our artists and designers worked to combine the edgy feel of graffiti with graphically stylized photographs of their employees. The end product was a series of murals that fully integrated their look as a contemporary work environment.
